## Sage Pastel Evolution V6.50 comes up with the goods.

One of the many features that Sage Pastel Evolution 6.50 delivers, is it allows customers to add user-defined fields on transaction lines for all documents, including invoices and purchase orders. See below for more features.

### New Features

- User defined fields on transaction lines - Invoice, Sales Order, Purchase Orders, GRV, RTS, Credit Note
- Duplicate Reference Numbers – Inventory Documents
- Cancelling of Post Date Cheques
- Cashbook – Allow 'Linked Accounts' payments/receipts
- Cashbook – Split lines now allow for Tax Types
- Unit of Measure – round off to the nearest unit

### Manufacturing

- Over and Under Manufacturing
- Auto Returns on all 'draw' lines

### Cost Prices

- Encryption of Cost Prices
- Masking of Cost Prices

### Audit Tool Logging

- All tables within Evolution
- Track any change
